I. Introduction

I would like to introduce Thailand because I've been there before, and I had such a great
time there that I want to go back for another trip again. Many foreigners also like to bring
their whole family to vacation in Thailand. It is a place where people can relax. I hope to
let more people know the beauty of it.

II. Something to know about Thailand

2.1 Location and Climate

(1) Location

“Thailand is located in the heart of Indochina. Its Full diameter is about 514,000
square kilometers.” (Lin, 2000) Thailand's land area is so big that Thailand has many zoos
that allow visitors to visit.

(2) Climate

“Thailand enjoys a tropical monsoon climate. Most of the annual average temperature
is 28 degrees Celsius. The annual range of temperature is, but 2 to 4 degrees. Humidity is
75%(Bangkok). The year can be divided into the rainy season, the dry season and
summer.” When I went in August, it happened to be the rainy season in Thailand. I was
just glad that it did not rain every day.

2.2 Food Culture

Thai people pay attention to sour, spicy, salty, sweet, and bitter flavors. To balance each
other, they usually have salty, sour, and spicy with a little sweet. Many Thai dishes are
bright red, which can increased appetite.

2.3 Tourism and entertainment

2.3.1 Sightseeing

(1) Floating Market
Sightseeing is popular in Watertown, which is a fusion of different architectural styles of Thailand's north, northeast, and southern rural culture. The composite mall covers an area of 36,800 square meters. On the water parked a lot of boats. Many people do business on their boats when I went there, I also bought a very special mango rice dumpling. The whole mango was cut and placed on glutinous rice, topped with sweet sauce. It was very delicious.

(2) Khao Kheow Open Zoo

“The zoo keeps 300 species and 8,000 animals. Tigers are the main attraction of the zoo. The world has more than 40 kinds of tigers, while the zoo contains 18 kinds of white tigers.” Here Thailand's largest wildlife park. The open park allows us to get close to the animals and observe them at a short distance. On the road you can see traces of flocks of monkeys. You can also buy some fruit to feed them. They also have animal instincts shows, which allow you to see a lot of different animal talent and performances.

(3) The Four-Faced Brahma Shipmate

The Four-Faced Brahma Shipmate in Thailand is called a responsive Buddha. The Four-Faced Brahma Shipmate is in fact India Brahma God, not Buddha. Their four faces represent kindness, compassion, good luck, and alms. I heard that if one make a wish, and
the wish comes true, one has to come back to show appreciation. If not, it would bring bad luck.

(4) Nanooch Trapical Garden

“Located 18 kilometers southeast of Pattaya, Nong Nooch is a large-scale modernization of the park.” The view is very beautiful. There is also a special elephant show. Elephants will do bowling, cycling, basketball shooting, football, and nose roll hoop. They are all unbelievable. These cute elephants would occasionally go toward the auditorium to eat bananas.

(5) Foreigner Street

Pattaya night life is very lively. There is a famous night market in Pattaya. It is regarded as Taiwan's so-called red-light district, and here the sex trade is legal. There are not only varieties of bars, but also a lot of stores to attract shopping customers.

2.3.2 Recreational activities

(1) Pattaya Beach

Pattaya is located along the crescent-shaped beach. It is 3 kilometers long. Another main attraction of Pattaya is its wide range of maritime activities. When I was there, I did parasailing. It was really fun! I felt like a bird flying in the air, giving me the good feeling of being free.
(2) Pattaya Park Tower

This is the first tower in the east coast of Thailand. It has a peculiar shape, like a tremendous lightning rod. Pattaya Park Tower goes up to 170 meters, overlooking the beautiful beach of Pattaya. The fifty-sixth floor of this tower is open to tourists to play slip floor. This activity is really exciting because of the height, but no one dare to after the terrorists attack.

(3) Night fishing cuttlefish

This is located in Pattaya, but night fishing location is on a big ship. It keeps some distance from the land. People have to go on the needed boat ride. Everyone has a fishing rod to catch cuttlefish, and everyone here will also help to prepare the seafood meal. During the meal, there are perfumers who would make sure the guests enjoy their big feasts.

2.4 Local culture

(1) Festival-Songkran

From April 13 to April 16, Songkran is the biggest traditional festival of Thailand and in the Southeastern Asia. Everyone gets up early in the morning, and have bathed liturgy. A few days later, they will spill each other with pure water, praying to wash away the bad
luck of the past, and the new year can start anew.

(2) Transgender culture—Tiffany Show

“Tiffany Cabaret Theatre is the pioneer of Thailand's most prestigious places of entertainment, but also the pioneer of Thai and Southeastern Asia Cabaret performances. As early as in 1974, performances began on the streets of Pattaya.” (Xia, 2004) There are a lot of transgender people. They are more beautiful than an average female. Their performances are also high standards of performance, and it is worthwhile to go to one of the shows.

(3) Minorities—the long-necked tribe

“The long-necked tribe is Padang family by Thailand's northern border with Myanmar's ethnic minorities. The long-necked tribe think the longer the neck is, the more beautiful woman is. Once the copper ring is worn, these women's neck muscles become very fragile, leaving the copper ring neck the risk of fracture.” I also took some good photographs when I traveled there.

III. Conclusion

Thailand is a good place worth recommending to everyone traveling. It is very suitable for vacation or family travel. There are many beautiful natural landscape and ecological wonders waiting for you to explore.
